

BASKETS

There are wire baskets available in various types and dimensions for serving different purposes in health care facilities. Wire baskets are used for forming surgical sets and transporting medical materials in hospitals. It is possible to create your own set design in wire baskets with the help of stainless steel or silicone dividers and holders. Wire baskets are also widely used for cleaning of surgical instruments in washing machines. Sterilization of wire baskets and their content wrapped in textile is commonly practiced.

Mini Size

Product Code	Outside Dimension
SC 490.05	265 x 120 x 50 mm

Half Size

Product Code	Outside Dimension
